

Black double hung window  
with black Profile™ DA hardware.

P-MK-01553-23

## INTRODUCING ALL BLACK WINDOWS, PATIO DOORS, AND HARDWARE

Now available to order in entryLINK

ProVia® is excited to introduce all black windows and patio doors as part of our Endure™ product line. The interior, exterior and jamb pocket will all be painted black.

All black Endure windows and patio doors will have a slightly textured paint, which gives it a matte finish. Opting for just an exterior painted window or patio door gives you the choice between Coal Black (our standard paint color option) or Matte Coal Black (which has a slightly textured feel to it).

Black hardware is already available for patio doors. Now you'll also have the option to add black hardware to Double Hung, Slider, Casement and Awning window styles.

- Accessories, other than stucco flange and shaped accessories, will be painted black on the interior and exterior.
- The aluminum screen frames on a Matte Coal Black painted patio door will have a Coal Black paint finish that is not matte.
- For black windows and patio doors with internal grids, they will always be Coal Black and not matte. Simulated Divided Lites (SDL's) will match the paint on the exterior and interior.
- All black window carry samples are available to order on entryLINK Marketing Materials under **Products Samples/Windows/Endure**. Or by part #: **S-MK-06613**.
- A Matte Coal Black color swatch (with texture) will be added to the paint color selector for the 2024 program launch.
